

[Irix]

Meet the Irix Edge IFH-100-PRO, advanced 100mm filter holder!

The Irix brand introduces an advanced square 100mm system filter holder featuring a drop-in polarizing filter.

Photo filters are an essential accessory for achieving impressive effects in your photographs. Being able to use many different types of filters with just one comprehensive tool is a great convenience and a ticket to outstanding shots. The IFH-100-PRO is an innovative filter holder which offers the ability to use simultaneously two 100mm filters at the same time with the polarizing filter. This accessory features a drop-in circular polarizer which is an essential tool used in landscape photography to achieve effects that cannot be replicated in post-production. Because of the spring-loaded locking mechanism, the Irix Edge IFH-100-PRO filter holder allows you to quickly and securely attach filters to your lens. The IFH-100-PRO is compatible with the most popular 100mm wide and 2mm thick filters and also with the ultra-thin 1.1mm filters thanks to the replacement spacers which are included in the set.

The Irix Edge IFH-100-PRO advanced holder is a functional tool for landscape photography enthusiasts. The key feature of this product is the ability to use both square and polarizing filters simultaneously. The main feature for ease of use is

external gear for smooth polariser adjustment. This feature ensures quick, precise and intuitive operation while keeping the lightweight and compact design of the holder.

The design of the holder draws from the technologies developed in the Irix Space Ready (SR) project. The holder has been covered with a special coating that reduces the light reflections, while the material from which it is made is characterized by excellent mechanical properties (resistance to crushing, impact and temperature fluctuations).

Drop-in Irix Edge IFH Polarizer filter included in the set is a combination of the latest generation of tempered optical glass with advanced anti-reflective coatings and Nano coating that prevents dirt and makes it extremely easy to clean. The IFH-100 PRO holder is compatible with most of the lenses thanks to the screw-in adapters with a diameter of 52mm to 95mm by using the appropriate adapter (adapter for the Irix 15mm f/2.4 is included in the set).

The Irix Edge IFH-100-PRO kit consists of:

- Square filter holder including a drop-in polarizing filter
- Interchangeable spacers allowing the use of 2mm or 1.1mm filters including mounting kit (additional screws and screwdriver)
- Dedicated adapter for the Irix 15mm f/2.4 lens

MSRP: 159.00 EUR (incl. Polarizing Filter)
